SUMMARY AND SKILLS

Team player, communicator and adventurer with a passion for personal development as much as web development. Equipped with a work history of engaging more than the initial job description requires and bootcamp skills I am zealously leveling up, I bring value in both the technical and social sense to any opportunity.

- Proficiency in Ruby, Ruby on Rails, HTML, CSS/Bootstrap, Javascript, and SQL for web application development
- Familiarity with GitHub/version control, APIs, web scraping, authorization/authentication, and Python
- Learning React next - October, 2021

PROJECTS (View in my [portfolio](#))

ANTEATER < [blog](#) >

Started Sept. 2021

- A simple bug tracking tool currently being developed as a solo project to practice Rails and gain new skills
- Learning mobile first design, responsiveness and how to identify critical content for smaller devices
- Testing myself by implementing React as the front end. I have no previous React experience
- Challenges include setting up an accurate relational database, and consistent planning and reevaluating the order in which I am setting up and executing the project to make sure I am efficient and creating the best end product

PLAN IT FOR ME < [GitHub](#) , [Live Site](#) >

Finished Aug. 2021

- A web application for lazy travelers who give a destination and their interests in return for a full itinerary
- Utilized two APIs (Amadeus and OpenTripMap). Each had incomplete data. Therefore, our second API call was based on the first call's results, giving a more complete and meaningful result to the user
- Difficulties included calculating distances between trip activities to give users an itinerary with minimal travel time and using sessions to pass data through the app without the need for a user to sign in

LOAN ME < [GitHub](#) , [Live Site](#) >

Finished Jul. 2021

- Loan Me, an app for the lonely- where users can "loan" their time to those who need a friend
- Developed as an Airbnb clone to implement bootcamp lessons on Rails, MVC models, relational database schema design, Geocoder, CSS, HTML, and authentication/authorization
- First team-based development, including daily stand-up meetings and tracking tasks using a Trello board

WORK EXPERIENCE

MINTEL GROUP LTD, DATA ENTRY SPECIALIST - REMOTE 13 MONTHS

Aug. 2019 to Apr. 2021

- Gained fundamental programming skills and presented code as a core member of Intel's Development Club
- Hit daily targets of hundreds of database entries and edits consistently while maintaining a high level of accuracy
- Planned social events as a co-leader of my department's Social Club and represented my team as a "Intel Champion", a group that gave feedback to help adapt Intel to the new challenges of the pandemic

VIETNAM USA SOCIETY, ENGLISH AS A FOREIGN LANGUAGE TEACHER

Aug. 2018 to Feb. 2019

- Taught and communicated complex instructions and concepts to non-native English speakers
- Planned daily lessons aimed at long-term, student goals for a wide range of skill levels and ages

EDUCATION

LE WAGON, FULL STACK WEB DEVELOPMENT BOOTCAMP

Jun. 2021 to Aug. 2021

- Completed daily challenges on Ruby, HTML, CSS, Javascript, and SQL in a pair programming environment
- Designed and deployed two Rails web applications as part of a team of four developers

UNIVERSITY OF IOWA, B.A. IN ENVIRONMENTAL SCIENCE, MINOR IN BIOLOGY

Graduated: 2015

- Undertook a two-year environmental research project and presented results
